Credit ratings issued by Moody's credit rating affiliates are their current opinions of the relative future credit risk of entities, credit commitments, or debt or debt-like securities, and materials, products, services and information published by Moody's (collectively, "publications") may include such current opinions. Moody's defines credit risk as the risk that an entity may not meet its contractual financial obligations as they come due and any estimated financial loss in the event of default or impairment. See applicable Moody's rating symbols and definitions publication for information on the types of contractual financial obligations addressed by Moody's credit ratings. Credit ratings do not address any other risk, including but not limited to: liquidity risk, market value risk, or price volatility. Credit ratings, non-credit assessments ("assessments"), and other opinions included in Moody's publications are not statements of current or historical fact. Moody's publications may also include quantitative model-based estimates of credit risk and related opinions or commentary published by Moody's analytics, Inc. and/or its affiliates. Moody's credit ratings, assessments, other opinions and publications do not constitute or provide investment or financial advice, and Moody's credit ratings, assessments, other opinions and publications are not and do not provide recommendations to purchase, sell, or hold particular securities. Moody's credit ratings assessments, other opinions and publications do not comment on the suitability of an investment for any particular investor. Moody's issues its credit ratings, assessments and other opinions and publishes its publications with the expectation and understanding that each investor will, with due care, make its own study and evaluation of each security that is under consideration for purchase, holding, or sale.

Moody's credit ratings, assessments, other opinions, and publications are not intended for use by retail investors and it would be reckless and inappropriate for retail investors to use Moody's credit ratings, assessments, other opinions or publications when making an investment decision.
