Normative Standard Screening

The United Nations Sustainable Development Goals (SDGs) and Global Compact (GC) provide internationally recognised blueprints for achieving a more sustainable future. Our normative screening solutions provide investors with the necessary data to align their investments with these standards. Partner with Moody's and develop thematic funds and indices to champion progress towards a more sustainable and resilient future.

Our Solutions:

SDG Alignment Screening

Our data solution provides a dual-lens screening for each of the 17 SDGs:

- » A Net contribution lens analyses the positive and negative contribution that a company makes to the SDGs based on its product and services;
- » A Net behaviour lens assesses a company's disclosures on policies and systems as well as its exposure to and management of controversies

Global Compact Screening

Our data solution provides comprehensive screening across the 4 Global Compact areas:

- » 0 -100 scores measure a company's management of Human Rights, Labour Rights, Environment and Anti-Corruption concerns;
